Representative Sinrud,

The Lolo Community Council has sent this communication to show our support for HB 6 that includes a renewable resource grant for Lolo waste water treatment. Lolo has its own waste treatment facility and the extreme rate we are growing at necessitates improvements. There are already plans to upgrade the system and the grant would prevent some of those costs from being passed on to the taxpayer.

Our community like many others in Montana is surrounded by National Forest, rivers, and creeks of historic significance. Like everyone we wish to keep this area healthy and beautiful. The Members of Council believe that having good waste water treatment is a responsibility and hopes you can approve this bill.

We appreciate your support,  
Lolo Community Council
